

The AIRLESS SYSTEM together with T-MIX gun allows to atomize the product adjusting the fan width according to your needs. The result is a perfect atomization on all the surface! 151 P together with T-MIX is ideal in the furniture and mechanical industry.

151 P is an airless pneumatic pump of the new TAIVER generation, which includes two patents. 151 P is the ideal pump for spraying all kind of products used in the furniture and mechanical industry.

## Construction specifications:

151 P uses an avant-garde technology which includes two patents: The instant volumetric reversal of pneumatic motor, that means a very low pressure drop during the reversal, and the simultaneous adjustment of packings. This simultaneous adjustment, depending on the wear, allows a longer life and a better performance of the unit. The piston is hard chrome treated and all the parts in contact with the products are in stainless steel. Very easy maintenance. Tungsten carbide valves.

## Performances:

151 P with a ratio 15:1 and a delivery of 30 cm<sup>3</sup> per cycle. The air motor, instant volumetric reversal (Taiver patented) allows a constant atomizing pressure and a high quality finishing. Light and handy to use, 151 P has no ice problems and the air motor can work in every place without lubrication.

## Technical Data:

- |                  |   |
|------------------|---|
| - Motor:         | Pneumatic motor instant volumetric reversal |
| - Ratio:         | 15:1  |
| - Weight:        | 14 Kg                                       |
| - Max. Delivery: | 6 lt/min                                    |
