

The airless system allows a big reduction of overspray with three important advantages: paint saving, high working speed, environmental protection.

3200 P is an airless pneumatic pump especially used in the small industry and handicrafts. 3200 P is ideal for spraying lakes, paints, polyurethans, for furniture polishing.

This airless pneumatic pump works with a pneumatic motor Taiver patented, which doesn't need any lubrication and has no ice problems. The instant volumetric reversal of the motor allows a constant flow without pulsations.

Construction specifications:

3200 P uses an avant-garde technology. The pneumatic motor, instant volumetric reversal, TAIVER patented, works without lubrication and has no ice problems. The pump cylinder has a special hardening treatment, which allows a longer life of pumps. Adjustable upper packing, tungsten carbide valves.

Performances:

3200 P with a ratio 26:1 and a delivery of 18 cm³ per cycle. The air motor, instant volumetric reversal (Taiver patented) allows a constant atomizing pressure and a high quality finishing. Light and handy to use, 3200 P has no ice problems and the air motor can work in every place without lubrication.

Technical Data:

- Motor: Pneumatic motor
instant volumetric
reversal
- Ratio: 26:1
- Weight: 14 Kg
- Max. Delivery: 3,2 lt/min
