

TURBO TB

TURBO TB is a low pressure spray system which produces hot air volume with a very low overspray.

TURBO TB produces hot and dry air. It is designed for high quality finishing! This is the ideal pump for small and medium spray jobs in any place.

Used by craftsmen, carpenters, for ironworks, etc.

Construction specifications:

TURBO TB is the unit designed to replace effectively the compressor used for painting. It can atomize any materials, included multicolor products. The low pressure and hot and dry air allow to spray without fog reducing the overspray.

Performances:

- Overspray reduction
- Paint saving up to 40%
- No maintenance needed
- Light and handy
- Strong HVLP gun
- Hot and dry air

Technical Data:

- Motor:	Elettric - 230 Volt/50 Hz
- Power:	1.300 Watt
- Weight:	7 Kg
- Air Volume:	3.000 lt/min.
- Max. Air Pressure:	380 gr/cm3
